

concrete database tables for MVP WIL hub. These are lean, but they cover the core workflow we outlined (students ↔ institution verification ↔ companies ↔ placements).

Core Tables

Students

- **student_id** (PK, UUID)
- **name**
- **email**
- **program_of_study**
- **graduation_year**
- **cv_url** (link to CV/portfolio)
- **skills** (array/text)
- **availability_date**
- **eligibility_status** (enum: provisional, verified)

Institutions

- **institution_id** (PK, UUID)
- **name**
- **contact_person**
- **email**
- **verification_role** (boolean → can mark students eligible)

Companies

- **company_id** (PK, UUID)
- **name**
- **industry**
- **contact_person**
- **email**
- **verified_status** (boolean → institution-approved company)

WIL_Programs

- **program_id** (PK, UUID)
- **company_id** (FK → Companies)
- **title**
- **description**
- **required_skills** (array/text)
- **slots_open** (int)
- **duration_months**
- **open_date, close_date**
- **posting_status** (enum: pending, approved, closed)

Applications

- **application_id** (PK, UUID)
- **student_id** (FK → Students)
- **program_id** (FK → WIL_Programs)
- **status** (enum: pending, shortlisted, selected, rejected)
- **date_applied**

Matches

- **match_id** (PK, UUID)
- **student_id** (FK → Students)
- **program_id** (FK → WIL_Programs)
- **institution_id** (FK → Institutions)
- **match_status** (enum: proposed, approved, rejected)
- **date_matched**

Placements

- **placement_id** (PK, UUID)
- **student_id** (FK → Students)

- **program_id** (FK → WIL_Programs)
- **company_id** (FK → Companies)
- **institution_id** (FK → Institutions)
- **start_date, end_date**
- **completion_status** (enum: ongoing, completed, failed)

Reports

- **report_id** (PK, UUID)
- **placement_id** (FK → Placements)
- **institution_id** (FK → Institutions)
- **graduation_impact** (boolean)
- **notes**

Workflow Coverage

- **Students:** Profile + eligibility status.
- **Institutions:** Verify students, approve postings, track placements.
- **Companies:** Post programs, shortlist, select.
- **Applications/Matches:** Handle the middle layer of interest + institutional validation.
- **Placements/Reports:** Track completion and graduation impact.

This schema is minimal but complete: it covers onboarding, posting, matching, selection, and tracking without forcing institutions to merge databases — they just update verification flags and placement records.
